

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

I ONLY have my phone for emergencies while I am not at home, primarily for when I am out driving especially if I have my children with me. I am not a cell user that uses my phone to "chat" with my friends, I have it so my kids can get in touch with me if they are out so that I know they are safe if they need me, they can get a hold of me if I am not at home. Its totally unfair and unnecessary to raise rates period!!! Thank you.

Keep the USF Fair!

Sincerely,

Tanya Kemmerling
